SAF CFE Credits - 4

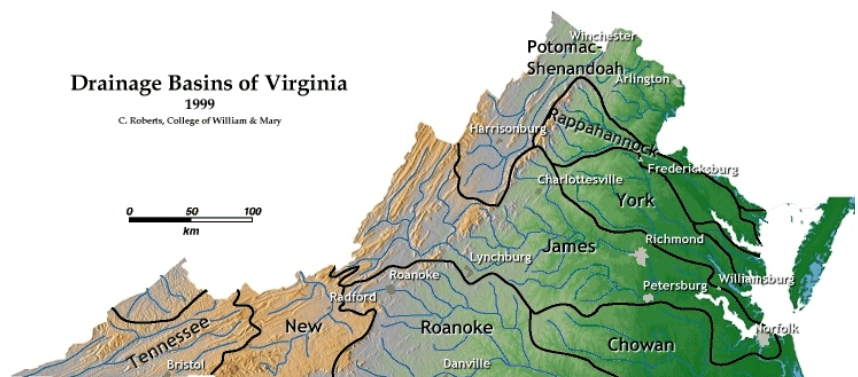

ISA Credits: Approved for 4 ISA CEUs for Arborist, Municipal & BCMA categories.

The Technical Conference may qualify for LA CE credits. Participants should check with their state governing body.

# Urban Stream Restoration in the Chesapeake Bay Watershed

Restoring degraded streams is critical if healthy urban forest ecosystems are to be maintained. Reconditioning, however, often requires substantial and costly operations. This regional program aims to cover the challenges and benefits of stream restoration in urban forests of the Chesapeake Bay Watershed using Arlington County's Donaldson Run Restoration Project as a case study.

A public meeting will be held at Arlington County's Department of Parks, Recreation, and Cultural Resources on Thursday evening June 18th to cover the social, economic, and environmental aspects of the Donaldson Run Restoration Project. Registration is free. The following day, a technical conference will occur at the same location to cover the accomplishments and lessons learned from Donaldson Run. Registration is \$30.

### Who should attend?

Community Leaders, Planners, Landscape Architects, Urban Foresters, Arborists, Park Managers, Developers and Builders, Homeowners and Interested Citizens

### Lunch and refreshments will be provided!!!
